

REACH Declaration of Compliance

Acorn Industrial Components are a distributor of finished articles and do not manufacture or import 1 tonne or more of any given substance and are therefore exempt from Registration. Additionally, the regulation is clear that it is only substances that are intentionally released from articles (under normal or reasonably foreseeable conditions of use) that should be considered for registration. The products that we sell do not intentionally release any substance during use.

We do however understand our responsibilities as a distributor and have a duty of care to communicate any REACH information to our customers. All duties under the European Union regulation no.1907/2006 on the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) regarding the disclosure of Substances of Very High Concern (SVHC) according to Article 33 of the regulation with respect to our products have been fulfilled. Please note that we hold Safety Data Sheets and these are available on request.

We maintain close contact with our suppliers to ensure our products meet quality approval. Any future changes of the REACH regulation will be monitored and communicated to our customers when necessary.

This statement covers all legitimate products offered by Acorn Industrial Components.

All questions regarding the disclosure requirements for the identified products should be directed to us using the contact information provided below.
